Appendix D

WTC 1 EAST FACE COMBINED FIRE AND WINDOW CONDITION AND WINDOW SMOKE CONDITION

This appendix provides visual representations of the data contained in data sheets describing observations of fire, smoke, and window condition on a window-by-window basis as a function of time for the east face of WTC 1. The data for window condition and fire observations are combined into single representations, with the data for fire taking precedence. Observations are represented using the key provided in Figure 5-1 as follows:  - window glass in place,  - window open,  - spot fire,  - fire visible inside,  - external flaming, and  - not visible. The data for smoke are shown in separate figures using the key from Figure 5-1 as follows:  - no smoke visible,  - light smoke,  - heavy smoke, and  - not visible. For a given time, the window condition and fire data are shown first.

Appendix G

WTC 2 NORTH FACE COMBINED FIRE AND WINDOW CONDITION AND WINDOW SMOKE CONDITION

This appendix provides visual representations of the data contained in data sheets describing observations of fire, smoke, and window condition on a window-by-window basis as a function of time for the north face of WTC 2. The data for window condition and fire observations are combined into single representations, with the data for fire taking precedence. Observations are represented using the key provided in Figure 5-1 as follows:  - window glass in place,  - window open,  - spot fire,  - fire visible inside,  - external flaming, and  - not visible. The data for smoke are shown in separate figures using the key from Figure 5-1 as follows:  - no smoke visible,  - light smoke,  - heavy smoke, and  - not visible. For a given time, the window condition and fire data are shown first.
